

Principal Structural Engineer / Senior Structural Engineer / Structural Engineer

We are seeking to recruit Structural Engineers as various levels of experience for our busy teams based in Northallerton, West Yorkshire and Penrith offices. You will be employed on a permanent full-time contract with flexible benefits with opportunity for flexible working options.

Salary range £25,000 to £50,000, dependant on experience and qualifications.

You will be joining a team of engineers that work within the company's multi-discipline workforce of Architects, Building Surveyors, Civil Engineers, M&E Engineers and Quantity Surveyors. If you are an energetic, motivated and proactive individual seeking new challenges and want to be part of a successful team in an exciting environment then we would like to hear from you.

You will be an essential part of a very busy and professional team that is part of a wider business with a very strong client portfolio. Align Property Partners have a record of consistently meeting and exceeding their targets and who have the passion and determination to improve their service continually.

Candidates should be qualified and be equipped with suitable experience to manage an increasing project workload.

Essential Skills / Qualifications:

- Degree in Civil/Structural Engineering or equivalent with at least 1 year's post-qualification experience.
- Experience within an engineering consultancy.
- Proficient in preparing sufficiently detailed designs and specifications using Auto CAD, REVIT, TEDDS, Tekla Structural Designer software or similar.
- Working knowledge of relevant UK and European codes of practice in reinforced concrete, steel, masonry and timber.
- Ability to complete surveys and reports.
- IT literacy with excellent working knowledge of Microsoft Word and Excel.
- Full UK driving license.
- For senior roles and above, an ability to manage project delivery and finances whilst providing adequate support to other members

Tasks that will be required of you include:

- Collaborating with the multi-discipline design team to develop structural designs which satisfy the aspirations of the Client and project while being rational from a constructability perspective.
- Producing conceptual and detailed superstructure designs for a wide range of clients in different sectors.
- Developing efficient and cost effective substructure solutions for varied and challenging sites.
- Responding to site queries, review fabrication details, visit site, attend meetings and monitor construction activities, as required.
- Liaising with the 'in house' design team and external parties to ensure practical and cost-effective solutions are utilised whenever possible.
- Undertaking technical design reviews with senior roles leading projects.
- Complying with designer's duties under the CDM Regulations.

CLOSING DATE: 5pm on 31 January 2022

INTERVIEWS: Multiple positions available.

Interviews to be held periodically throughout the advert life span.
