

About the job

Role Summary

Role: Senior Structural Technician

Salary: £28,000 to £35,000 per annum

Location: Hybrid with home working and in our Northallerton or West Yorkshire offices. Some travel required to visit sites across the North of England

Contract: Established, full time

About the role:

Are you looking for a flexible role with home based working? Somewhere you can bring your significant skills and experience to a varied and fast-paced role?

We are recruiting for a Senior Structural Engineering Technician to join our team based either in our Northallerton or Otley offices. This role gives you the opportunity to be at the forefront of developing efficient and cost effective substructure solutions for varied and challenging sites.

You will be joining a team of engineers and technicians that work within the company's multi-discipline workforce. As Senior Structural Technician you will be an essential part of a very busy and professional team who are constantly striving to innovate through their collaborations and to consistently meet and exceed their targets.

Collaborating with the multi-discipline design team, you'll develop structural designs which satisfy the aspirations of the client while being rational from a constructability perspective and liaising with the 'in house' design team and external parties to ensure practical and cost-effective solutions are utilised whenever possible.

Essential Skills / Qualifications:

- HNC/HND in Civil/Structural Engineering or equivalent with at least 5 years post-qualification experience.
- Proficient in preparing quality engineering details and specifications using Auto CAD, REVIT, TEDDS, Tekla Structural Designer software or similar.

- Working knowledge of relevant UK and European codes of practice in reinforced concrete, steel, masonry and timber.
- IT literacy with excellent working knowledge of Microsoft Word and Excel.
- Full UK driving license.
